Catalog of Catalogs documents nearly 2,300 temporary exhibition catalogs, 1876-2018, that include objects of Judaica. It provides highly-detailed indices of these publications' subjects, exhibited objects and geographical foci.

The Black Death of 1348-50 devastated Europe. With mortality estimates ranging from thirty to sixty percent of the population, it was arguably the most significant event of the fourteenth century. Nonetheless, its force varied across the continent, and so did the ways people responded to it. Surprisingly, there is little Jewish writing extant that directly addresses the impact of the plague, or even of the violence that sometimes accompanied it. This absence is particularly notable for Provence and the Iberian Peninsula, despite rich sources on Jewish life throughout the century. In *After the Black Death*, Susan L. Einbinder uncovers Jewish responses to plague and violence in fourteenth-century Provence and Iberia. Einbinder's original research reveals a wide, heterogeneous series of Jewish literary responses to the plague, including Sephardic liturgical poetry; a medical tractate written by the Jewish physician Abraham Caslari; epitaphs inscribed on the tombstones of twenty-eight Jewish plague victims once buried in Toledo; and a heretofore unstudied liturgical lament written by Moses Nathan, a survivor of an anti-Jewish massacre that occurred in Tàrrega, Catalonia, in 1348. Through

elegant translations and masterful readings, *After the Black Death* exposes the great diversity in Jewish experiences of the plague, shaped as they were by convention, geography, epidemiology, and politics. Most critically, Einbinder traces the continuity of faith, language, and meaning through the years of the plague and its aftermath. Both before and after the Black Death, Jewish texts that deal with tragedy privilege the communal over the personal and affirm resilience over victimhood. Combined with archival and archaeological testimony, these texts ask us to think deeply about the men and women, sometimes perpetrators as well as victims, who confronted the Black Death. As devastating as the Black Death was, it did not shatter the modes of expression and explanation of those who survived it—a discovery that challenges the applicability of modern trauma theory to the medieval context.

This volume presents a comprehensive study of the urban topography of Anglo-Jewry in the period before the mass immigration of 1881. The book brings together the evidence for the physical presence of at least 80% of the Jewish community. London and thirty-five provincial cities and towns are discussed.

Real understanding of past societies is not possible without including children, and yet they have been strangely invisible in the archaeological record. Compelling explanation about past societies cannot be achieved without including and investigating children and childhood.

However marginal the traces of children's bodies and bricolage may seem compared to adults, archaeological evidence of children and childhood can be found in the most astonishing places and spaces. The archaeology of childhood is one of the most exciting and challenging areas for new discovery about past societies. Children are part of every human society, but childhood is a cultural construct. Each society develops its own idea about what a childhood should be,

what children can or should do, and how they are trained to take their place in the world. Children also play a part in creating the archaeological record itself. In this volume, experts from around the world ask questions about childhood - thresholds of age and growth, childhood in the material culture, the death of children, and the intersection of the childhood and the social, economic, religious, and political worlds of societies in the past.

This book brings together research on the relations between people and the planet's living and non-living resources. Its three main foci include the methodological approaches to the study of relationships between people and land use, patterns of consumption, population trends and the availability of food and water resources; an examination of evidence of disequilibria in increasing conflicts, migrations, and over-crowding; and a search for balance between people and the other elements of the biosphere through understanding and overcoming destructive forces.

Investigating Jewish spatial practices by exploring the symbol of the house in Judaism, this book examines two groups of houses: ritual objects based on the iconology of the house (ritual houses) and house metaphors (the text, community and the covenant with god as house). This unique pairing is explored as place-making tools which exist in a constant state of tension between diaspora and belonging. Containing many photographs of historical and contemporary artefacts from Europe, Israel and the United States, this book maps out the intersection of architecture, Jewish studies, cultural and gender studies and opens up the discussion of distinctly Jewish objects and metaphors to discourses taking place outside explicitly Jewish contexts.

England during the Middle Ages was at the forefront of European antisemitism. It was in medieval Norwich that the notorious "blood libel" was first introduced when a resident accused the city's Jewish leaders of abducting and ritually murdering a local boy. England also enforced legislation demanding that Jews wear a badge of infamy, and in 1290, it became the first European nation to expel forcibly all of its Jewish residents. In *The Accommodated Jew*, Kathy Lavezzo rethinks the complex and contradictory relation between England's rejection of "the Jew" and the centrality of Jews to classic English literature. Drawing on literary, historical, and cartographic texts, she charts an entangled Jewish imaginative presence in English culture. In a sweeping view that extends from the Anglo-Saxon period to the late seventeenth century, Lavezzo tracks how English writers from Bede to Milton imagine Jews via buildings—tombs, latrines and especially houses—that support fantasies of exile. Epitomizing this trope is the blood libel and its implication that Jews cannot be accommodated in England because of the anti-Christian violence they allegedly perform in their homes. In the Croxton Play of the Sacrament, Marlowe's *The Jew of Malta* and Shakespeare's *The Merchant of Venice*, the Jewish house not only serves as a lethal trap but also as the site of an emerging bourgeoisie incompatible with Christian pieties. Lavezzo reveals the central place of "the Jew" in the slow process by which a Christian "nation of shopkeepers" negotiated their relationship to the urban capitalist sensibility they came to embrace and embody. In the book's epilogue,

she advances her inquiry into Victorian England and the relationship between Charles Dickens (whose Fagin is the second most infamous Jew in English literature after Shylock) and the Jewish couple that purchased his London home, Tavistock House, showing how far relations between gentiles and Jews in England had (and had not) evolved.

Completely revised and updated for this new edition, Benedictow's acclaimed study remains the definitive account of the Black Death and its impact on history. The first edition of *The Black Death* collected and analysed the many local studies on the disease published in a variety of languages and examined a range of scholarly papers. The medical and epidemiological characteristics of the disease, its geographical origin, its spread across Asia Minor, the Middle East, North Africa and Europe, and the mortality in the countries and regions for which there are satisfactory studies, are clearly presented and thoroughly discussed. The pattern, pace and seasonality of spread revealed through close scrutiny of these studies exactly reflect current medical work and standard studies on the epidemiology of bubonic plague. Benedictow's findings made it clear that the true mortality rate was far higher than had been previously thought. In the light of those findings, the discussion in the last part of the book showing the Black Death as a turning point in history takes on a new significance. OLE J. BENEDICTOW is Professor of History at the University of Oslo.

This book surveys contemporary responses to the Black Death. When boy-detective Peregrine Harker stumbles across a gruesome murder he sparks a chain of events that drag him on a rip-roaring journey through a world of spluttering gas lamps, thick fog, deadly secrets and dastardly villains. Every step of Peregrine's white-knuckle adventure brings him closer to the vile heart of a terrifying mystery – the true story behind the Brotherhood of the Black Death.

We here find an important page of the history of the world laid open to our view. It treats of a convulsion of the human race, unequalled in violence and extent. It speaks of incredible disasters, of despair and unbridled demoniacal passions. It shews us the abyss of general licentiousness, in consequence of an universal pestilence, which extended from China to Iceland and Greenland. The inducement to unveil this image of an age, long since gone by, is evident. A new pestilence has attained almost an equal extent, and though less formidable, has partly produced, partly indicated, similar phenomena. Its causes and its diffusion over Asia and Europe, call on us to take a comprehensive view of it, because it leads to an insight into the organism of the world, in which the sum of organic life is subject to the great powers of Nature. Now, human knowledge is not yet sufficiently advanced, to discover the connexion between the processes which occur above, and those which occur below, the surface of the earth, or even fully to explore the laws of nature, an acquaintance with which would be required, far less to apply them to great phenomena, in which one spring sets a thousand others in motion. On this side, therefore, such a point of view is not to be found, if we would not lose ourselves in the wilderness of conjectures, of which the world is already too full: but it may be found in the ample and productive field of historical research. History—that mirror of human life in all its bearings, offers, even for general pestilences, an inexhaustible, though scarcely

explored, mine of facts; here too it asserts its dignity, as the philosophy of reality delighting in truth. It is conformable to its spirit to conceive general pestilences as events affecting the whole world, to explain their occurrences by the comparison of what is similar, by which the facts speak for themselves, because they appear to have proceeded from the higher laws which govern the progression of the existence of mankind. A cosmical origin and convulsive excitement, productive of the most important consequences among the nations subject to them, are the most striking features to which history points in all general pestilences. The latter, however, assume very different forms, as well in their attacks on the general organism, as in their diffusion; and in this respect a development from form to form, in the course of centuries, is manifest, so that the history of the world is divided into grand periods in which positively defined pestilences prevailed. As far as our chronicles extend, more or less certain information can be obtained respecting them. But this part of medical history, which has such a manifold and powerful influence over the history of the world, is yet in its infancy. For the honor of that science which should everywhere guide the actions of mankind, we are induced to express a wish, that it may find room to flourish amidst the rank vegetation with which the field of German medical science is unhappily encumbered.

Medieval feudal society was built on a sociopolitical and economic system guided by feudalism and the transcendental views of Christianity. Both of these institutions were put to the test during the Black Death epidemic, the deadliest disaster humankind has suffered, given the population of the time. Without a doubt, this event revolutionized medieval society in every way and accelerated a process of change that had been brewing for centuries. But the impact of the plague went well beyond loss of life. It fatally wounded the spiritual, social and economic foundations of the medieval world, to such an extent that one could shift the traditional timeline and mark 1347, the year the plague began, as the true end of the Middle Ages. We can read many statistics on the economic and demographic impact of the Black Death in Europe, but nothing reflects the ordeal better than the painting, "The Triumph of Death," by Flemish artist Pieter Brueghel the Elder. We cannot help but shudder at the helplessness and despair of these people trying in vain to escape their fate. Peasants, nobles, priests, kings, and bishops, all made equal by death, while armies of skeletons chase after them, proclaiming the end of

times. In the face of an ordered, hierarchal medieval society, this painting shows us chaos, disorder and equality in death. In this book, I will attempt to summarize, first, how the Church and feudalism were the bases of medieval society, then in the following chapters describe the principal economic, social, and spiritual effects of the plague and how Europe was changed forever.

Describes the 1347-1351 outbreak of plague in Europe, known as the Black Death, which killed one out of three people and changed the course of European history.

This book lends an overview of the history of the plague, as well as 19th-century knowledge of its cause. This book serves as a wonderful introduction to the topic of the Black Death with some profoundly interesting facts contained within. For example, women were distinctly more fertile after the cessation of the Black Plague, with double and triple birth rates being markedly more common.

In the middle of the 14th century, Europe was devastated by an appalling epidemic which killed a third of its population. Accused of having spread the disease, Jewish communities faced terrible persecutions, which often led them to bury their most valuable goods. Two of these hoards, discovered at Colmar in 1863 and at Erfurt in 1998, are discussed and illustrated here. Comprising a great variety of jewelry, gold- and silversmiths' work, and coins, these two hoards constitute an exceptional source for the study of secular metalwork in the 13th and 14th centuries, very few examples of which have otherwise come down to us. They provide precious evidence of the economic activities and daily life of the medieval Jewish communities, but also of their precarious position within Christian Europe. In Erfurt over 1,000 people were killed, the entire Jewish population. Some of the objects, because of their very personal

A virus similar to the Black Death outbreak has struck England. Mrs. Hawkins soon learns there are things worse than death. The dead have come back to life, and they are hungry. Jim Hawkins is on his way home with treasure in the belly of the Hispaniola. Captain Smollett is back in charge of the ship, and Long John Silver has agreed to stand trial at home, if only for the chance to make it home. Wanting only to save his mother and seek sanctuary, Jim realizes survival comes down to instinct and sacrifice in this continuation of Stevenson's timeless classic, *Treasure Island*

the authors of *Return of the Black Death* argue that the plague, which vanquished half of Europe, has only lain dormant, waiting to emerge again—perhaps, in another form. At the heart of their chilling scenario is their contention that the plague was spread by direct human contact (not from rat fleas) and was, in fact, a virus perhaps similar to AIDS and Ebola. Noting the periodic occurrence of plagues throughout history, the authors predict its inevitable re-emergence sometime in the future, transformed by mass mobility and bioterrorism into an even more devastating killer.

This monograph represents an expansion and deepening of previous works by Ole J. Benedictow - the author of highly esteemed monographs and articles on the history of plague epidemics and historical demography. In the form of a collection of articles, the author presents an in-depth monographic study on the history of plague epidemics in Scandinavian countries and on controversies of the microbiological and epidemiological fundamentals of plague epidemics.

In this fresh approach to the history of the Black Death, John Hatcher, a world-renowned scholar of the Middle Ages, recreates everyday life in a mid-fourteenth century rural English village. By focusing on the experiences of ordinary villagers as they lived -- and died -- during the Black Death (1345-50 AD), Hatcher vividly places the reader directly into those tumultuous years and describes in

fascinating detail the day-to-day existence of people struggling with the tragic effects of the plague. Dramatic scenes portray how contemporaries must have experienced and thought about the momentous events -- and how they tried to make sense of it all.
