medical procedures and services. Providers want accurate reimbursement. Payers want efficient claims processing. Since the CPT® code set is a dynamic, everchanging standard, an outdated codebook does not suffice. Correct reporting and billing of medical procedures and services begins with CPT® 2021 Professional Edition. Only the AMA, with the help of physicians and other experts in the health care community, creates and maintains the CPT code set. No other publisher can claim that. No other codebook can provide the official guidelines to code medical services and procedures properly.

Basic Current Procedural Terminology and HCPCS Coding Exercises reinforces beginning and intermediate coding students' coding knowledge with skill-building drills and real-world case studies. The reader can expect exercises that test knowledge of medical terminology, anatomy, and clinical concepts through instruction designed to bridge the gap between clinical documentation and coding. An assortment of in-depth case studies includes questions that encourage the student to extract the information needed to determine the index terms that will lead them to the correct code assignment. The first chapter has been expanded to include student practice for identifying key documentation elements to support coding decisions. The answer key offers solutions to all terminology and clinical concept questions, as well as detailed rationales for select coding drills and case studies. Individual coders can use it for self-assessments while instructors are still able to test students' skills and knowledge. Detailed author explanations are presented in bold type for easy self-checking, providing clearer understanding of the relationship between documentation and correct CPT® code assignment. Key Features
