This series is endorsed by Cambridge International Examinations and is part of Cambridge Maths.

Watch a video introduction here. Statistics Through Applications (STA) is the only text written specifically for high school statistics course. Designed to be read, the book takes a data analysis approach that emphasizes conceptual understanding over computation, while recognizing that some computation is necessary. The focus is on the statistical thinking behind data gathering and interpretation. The high school statistics course is often the first applied math course students take. STA engages students in learning how statisticians contribute to our understanding of the world and helps students to become more discerning consumers of the statistics they encounter in ads, economic reports, political campaigns, and elsewhere. New and improved! STA 2e features expanded coverage of probability, a reorganized presentation of data analysis, a new color design and much more. Please see the posted sample chapter or request a copy today to see for yourself.

Solved Papers (1-25).

From the introduction: The purpose of this book is to provide novice and seasoned teachers alike with guidelines for success during their careers. This is not a survival guide. Setting the goal of survival is too low a mark of achievement for you. This book will take you far beyond the gauge of survival into the area of success. With the help of this book, you will surpass survival and become a confident, focused, effective, and successful professional.

Combining mathematical history and recreational mathematics, details the history behind Venn diagrams, the intersecting circles used to visually represent logical propositions.

This book constitutes the proceedings of the 5th International Conference, FUN 2010, held in June 2010 in Ischia, Italy. FUN with algorithms is a three-yearly conference that aims at attracting works which, besides a deep and interesting algorithmic content, also present amusing and fun aspects. The 32 full papers and 3 invited talks are carefully selected from 54 submissions and focus on topics such as distributed algorithms, graph computations, parallelism, zero-knowledge proof, iphone, pattern matching and strategy games.

MATHEMATICS FOR ELEMENTARY SCHOOL TEACHERS, 6E offers future teachers a comprehensive mathematics course designed to foster concept development through examples, investigations, and explorations. In this text, intended for the one- or two-semester course required of Education majors, Bassarear demonstrates that there are many paths to solving a problem, and sometimes problems have more than one solution. The author presents real-world problems—problems that require active learning in a method similar to how archaeologists explore an archaeological find: they carefully uncover the site, slowly revealing more and more of the structure. Visual icons throughout the main text allow instructors to easily connect content to the hands-on activities in the corresponding Explorations Manual. With this exposure, future teachers will be better able to assess student needs using diverse approaches. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

This work provides school change leaders with tools, techniques, tips, examples, illustrations, and stories about promoting school change. Tools provided include histograms, surveys, run charts, weighted voting, force-field analysis, decision matrices, and many others. Chapter 1, "Introduction," applies a matrix for asking questions about change in four typical scenarios. Chapter 2, "Asking the Right Questions," presents critical questions regarding five stages of school improvement: preparation, focus, diagnosis, plan development, and implementation/monitoring. Chapter 3, "Answering the 'Where Are We Now?' Question," discusses ways to use data on student achievement, perceptual data, and the need to clarify roles and responsibilities. Chapter 4, "Answering the 'Where Do We Want to Go?' Question," applies the initiation, planning, and training stages of three models. Chapter 5, "Answering the 'How Will We Get There?' Question," contrasts the planning, training, and implementation stages of three relevant models. Chapter 6, "Answering the 'How Will We Know We Are (Getting) There?' Question," explores elements of assessing outcomes and reveals the importance of accurate monitoring. Chapter 7, "Answering the 'How Will We Sustain the Focus and Momentum?' Question" demonstrates the need for such critical elements as maintenance, institutionalization, and the PDCA tasks of check, act, and adjust plans. Chapter 8, "Bonus Questions" includes additional guidance for administrators on other aspects of school-improvement efforts. Chapter 9, "Using This Book," contains an index of tools and reviews scenarios and examples to further clarify the use of the tools described in earlier chapters. (Contains 21 annotated references and a 7-page index.) (TEJ)

SBI & IBPS Bank Clerk 30 SOLVED PAPERS consists of past solved papers of SBI, IBPS and other Nationalised Bank Exams from 2009 to 2016. Situation theory is the result of an interdisciplinary effort to create a full-fledged theory of information. Created by scholars and scientists from cognitive science, computer science, AI, linguistics, logic, philosophy, and mathematics, the theory is forging a common set of tools for the analysis of phenomena from all these fields. This volume presents work that evolved out of the Second Conference on Situation Theory and its Applications. Twenty-six essays exhibit the wide range of the theory, covering such topics as natural language semantics, philosophical issues about information, mathematical applications, and the visual representation of information in computer systems. Jon Barwise is a professor of philosophy, mathematics, and logic at Indiana University in Bloomington. Jean Mark Gawron is a researcher at SRI International and a consultant at Hewlett-Packard Laboratories. Gordon Plotkin is a professor of theoretical computer science at the University of Edinburgh. Syun Tutiya is in the philosophy department at Chiba University in Japan.
