The International Corporate 1000 represents a joint venture between Monitor Publishing Company of Washington, DC, and Graham & Trotman Limited of London. Monitor Publishing Company is well known as the publisher of The Federal Yellow Book, The Congressional Yellow Book, and The Corporate 1000. Graham & Trotman's annual directories providing data on the major companies in many parts of the world are equally established. The two publishing companies have pooled their expertise in this joint venture to research, compile and publish The International Corporate 1000, A Directory of Who Runs The World's 1000 Leading Corporations. The directory was designed to help you identify and contact the senior executives who lead and manage these companies. Accordingly, you will find extensive, valuable detail about who does what, and how to reach them, but you will find little financial or statistical data. We have designed the book in this way because we believe there is a great need for an accurate and current executive directory, whereas a wealth of financial data is already available from many different sources. The organization of the directory is by key geographical region, then by major country within each region, and then alphabetically by company within each country. This authoritative catalogue of the Corcoran Gallery of Art's renowned collection of pre-1945 American paintings will greatly enhance scholarly and public understanding of one of the finest and most important collections of historic American art in the world. Composed of more than 600 objects dating from 1740 to 1945.

When security and arms control analysts list what has helped keep nuclear weapons technologies from spreading, energy economics is rarely, if ever, mentioned. Yet, large civilian nuclear energy programs can-and have-brought states quite a way towards developing nuclear weapons; and it has been market economics, more than any other force, that has kept most states from starting or completing these programs. Since the early 1950s, every major government in the Western Hemisphere, Asia, the Middle East, and Europe has been drawn to atomic power's allure, only to have market realities prevent most of their nuclear investment plans from being fully realized. Adam Smith's Invisible Hand, then, could well determine just how far civilian nuclear energy expands and how much attention its attendant security risks will receive. Certainly, if nuclear power's economics remain negative, diplomats and policymakers could leverage this point, work to limit legitimate nuclear commerce to what is economically competitive, and so gain a powerful tool to help limit nuclear proliferation. If nuclear power finally breaks from its past and becomes the cheapest of clean technologies in market competitions against its alternatives, though, it is unlikely that diplomats and policymakers will be anywhere near as able or willing to prevent insecure or hostile states from developing nuclear energy programs, even if these programs help them make atomic weapons. Will the global spread of nuclear power programs, which could bring many more countries much closer to acquiring nuclear weapons capabilities, be an inevitable consequence of energy market economics? Or is such an expansion impossible without government subsidies and new policies to support them? This volume showcases the analyses of some of the world's leading energy experts to shed light on this key 21st century security issue.

The Black Swan is a standalone book in Nassim Nicholas Taleb's landmark Incerto series, an investigation of opacity, luck, uncertainty, probability, human error, risk, and decision-making in a world we don't understand. The other books in the series are Fooled by Randomness, Antifragile, and The Bed of Procrustes. A black swan is a highly improbable event with three principal characteristics: It is unpredictable; it carries a massive impact; and, after the fact, we concoct an explanation that makes it appear less random, and more

predictable, than it was. The astonishing success of Google was a black swan; so was 9/11. For Nassim Nicholas Taleb, black swans underlie almost everything about our world, from the rise of religions to events in our own personal lives. Why do we not acknowledge the phenomenon of black swans until after they occur? Part of the answer, according to Taleb, is that humans are hardwired to learn specifics when they should be focused on generalities. We concentrate on things we already know and time and time again fail to take into consideration what we don't know. We are, therefore, unable to truly estimate opportunities, too vulnerable to the impulse to simplify, narrate, and categorize, and not open enough to rewarding those who can imagine the "impossible." For years, Taleb has studied how we fool ourselves into thinking we know more than we actually do. We restrict our thinking to the irrelevant and inconsequential, while large events continue to surprise us and shape our world. In this revelatory book, Taleb explains everything we know about what we don't know, and this second edition features a new philosophical and empirical essay, "On Robustness and Fragility," which offers tools to navigate and exploit a Black Swan world. Elegant, startling, and universal in its applications, *The Black Swan* will change the way you look at the world. Taleb is a vastly entertaining writer, with wit, irreverence, and unusual stories to tell. He has a polymathic command of subjects ranging from cognitive science to business to probability theory. *The Black Swan* is a landmark book—itsself a black swan. Praise for Nassim Nicholas Taleb "The most prophetic voice of all."—GQ Praise for *The Black Swan* "[A book] that altered modern thinking."—The Times (London) "A masterpiece."—Chris Anderson, editor in chief of *Wired*, author of *The Long Tail* "Idiosyncratically brilliant."—Niall Ferguson, *Los Angeles Times* "The *Black Swan* changed my view of how the world works."—Daniel Kahneman, Nobel laureate "[Taleb writes] in a style that owes as much to Stephen Colbert as it does to Michel de Montaigne. . . . We eagerly romp with him through the follies of confirmation bias [and] narrative fallacy."—The Wall Street Journal "Hugely enjoyable—compelling . . . easy to dip into."—Financial Times "Engaging . . . *The Black Swan* has appealing cheek and admirable ambition."—The New York Times Book Review From the Hardcover edition.

Shortlisted for the Financial Times and Goldman Sachs Business Book of the Year Prize 2008 *The Snowball* is the first and will be the only biography of the world's richest man, Warren Buffett, written with his full cooperation and collaboration. Combining a unique blend of "The Sage of Omaha's" business savvy, life story and philosophy, *The Snowball* is essential reading for anyone wishing to discover and replicate the secrets of his business and life success. Warren Buffett is arguably the world's greatest investor. Even as a child he was fascinated by the concept of risk and probability, setting up his first business at the age of six. In 1964 he bought struggling Massachusetts textile firm Berkshire Hathaway and grew it to be the 12th largest corporation in the US purely through the exercise of sound investing principles - a feat never equalled in the annals of business. Despite an estimated net worth of around US\$62 billion, Buffett leads an intriguingly frugal life taking home a salary of only £50,000 a year. His only indulgence is a private jet, an extravagance he wryly acknowledges by calling it "The Indefensible". In 2006, he made the largest charitable donation on record, with most of it going to the Bill & Melinda Gates Foundation. *The Snowball* provides a comprehensive, richly detailed insight one of the world's most extraordinary and much loved public figures.

In 2015, building on the advances of the Millennium Development Goals, the United Nations adopted Sustainable Development Goals that include an explicit commitment to achieve universal health coverage by 2030. However, enormous gaps remain between what is achievable in human health and where global health stands today, and progress has been both incomplete and unevenly distributed. In order to meet this goal, a deliberate and comprehensive effort is needed to improve the quality of health care services globally. *Crossing the Global Quality Chasm: Improving Health Care Worldwide* focuses on one particular shortfall in health care affecting global populations: defects in the quality of care. This study reviews the available evidence on the quality of care worldwide and makes recommendations to improve health care quality globally while expanding access to preventive and therapeutic services, with a focus in low-resource areas. *Crossing the Global Quality Chasm* emphasizes the organization and delivery of safe and effective care at the patient/provider interface. This study explores issues of access to services and commodities, effectiveness, safety, efficiency, and equity. Focusing on front line service delivery that can directly impact health outcomes for individuals and populations, this book will be an essential guide for key stakeholders, governments, donors, health systems, and others involved in health care.

Winner of the Pulitzer Prize for Biography In this bestselling and widely acclaimed memoir, Katharine Graham, the woman who piloted the Washington Post through the scandals of the Pentagon Papers and Watergate, tells her story—one that is extraordinary both for the events it encompasses and for the courage, candor, and dignity of its telling. « L'économie est cette jungle où nous vivons, nous produisons, nous échangeons, nous gagnons de l'argent et nous en dépensons. Une jungle tellement touffue qu'elle provoque souvent l'incompréhension ou même la peur. Plutôt que de s'obstiner à la voir comme un jardin

bien dégagé ou un enfer, pourquoi ne pas la saisir par petites touches ? L'économie, c'est bien sûr des idées, des chiffres, des théories. Mais aussi des hommes, des produits, des entreprises, avec leurs histoires, leurs rêves, leurs exploits, leurs échecs. Ce livre propose tout cela à la fois, en dressant un tableau impressionniste d'une économie que l'on peut apprécier, détester, déchiffrer mais plus ignorer. Si nous voulons vraiment comprendre le monde d'aujourd'hui, il est urgent de dépasser le cliché d'une économie triste ou horrible. L'économie, c'est d'abord des histoires d'hommes et de femmes qui produisent, échangent, consomment et rêvent. C'est ensuite des entreprises, des objets, des institutions publiques, des lieux. C'est enfin des idées, des penseurs, des concepts. Ce livre propose l'inverse d'une grande théorie : il dresse par petites touches le tableau d'une économie qui n'est pas toujours ce que l'on croit. Mot à mot, il éclaire des pans petits ou grands de ce champ immense. » J.M.V. D'Adam Smith à Pierre Bérégovoy, de Michelin à EADS, en passant par le micro crédit et les stock options, Jean-Marc Vittori nous livre une approche souvent insolente et personnelle des concepts, des acteurs et des théoriciens de l'économie. Sans souci d'objectivité ni d'exhaustivité, loin des idées reçues et du conformisme, ce dictionnaire se met à la portée des novices tout autant qu'il s'adresse aux spécialistes.

Pourquoi, aujourd'hui, en France, faut-il avoir honte d'être riche ? D'où vient ce rapport de culpabilité que les Français entretiennent avec l'argent ? Du « Je n'aime pas les riches » de François Hollande aux tollés que suscitent les tentatives d'abroger l'impôt sur la fortune, Éric

Brunet a enquêté sur cette haine du profit et du libéralisme, mythes savamment entretenus tant par la gauche que par la droite. Car, depuis 1945, les politiques n'ont cessé à l'unisson de montrer du doigt ceux qui créent de la richesse et de la croissance. Résultat : 2 millions de Français (actifs) ont quitté le territoire. Emmurée dans ses obsessions égalitaires qui stigmatisent la création d'entreprises ou le développement économique, la France cultive un tabou idéologique et culturel sans discernement. Du « temps béni du capitalisme français » à l'immobilisme contemporain, ce livre iconoclaste explore cette singularité française et établit les perspectives pour sortir de l'impasse.
